**Re: S.B. 76**

Dear Senator Stalzer and Representative Tordsen:

The Professional Certification Coalition (PCC) writes to share our views regarding S.B. 76, which provides for licensure by endorsement. The PCC urges amendments to S.B. 76 to ensure that residents can rely on South Dakota's occupational licensing agencies to protect against occupational practice by unqualified individuals.

The PCC is a nonprofit association formed to address legislation that affects professional certification programs, those who hold private certification credentials, and the many constituencies that rely on professional certification. The PCC's organizational members include non-governmental professional certification organizations, professional societies, and service providers. Our members reflect a wide spectrum of professions, including health care, engineering, financial services, and information technology, among many others. Our founding organizations – the American Society of Association Executives (the leading organization for association management) and the Institute for Credentialing Excellence (the leading developer of accreditation standards for professional certification programs) – govern the PCC.

The PCC supports reducing unnecessary barriers for licensed professionals who move to a new state. However, as noted in the attached [Statement of Principles](#), not all state-specific requirements are unwarranted: substantive state-specific licensing requirements protect the public from unqualified or unethical practitioners and uphold the integrity of licensed professions as a whole.

Accordingly, the PCC proposes the following amendments to current law to ensure that the standards for South Dakota licensure are maintained when granting licensure by endorsement:

- Amend Section 36-1D-1(1) to read: “Holds a current license, certificate, registration, or permit from another state, territory, or country **in an occupation or profession with a substantially similar scope of practice to that in this state** and the licensing board determines that state's, territory's, or country's requirements are substantially equivalent to or exceed the requirements established in this state.”
- Amend Section 36-1D-1(2) to read “Demonstrates competency in the profession or occupation **substantially equivalent to or exceeding the competency required for licensees in this state**, through methods determined by the licensing board or a department secretary, if the secretary is responsible for issuing the license.”

This bill directly affects protections for the public and PCC members that confer credentials to professionals in regulated occupations, such as health care, in which certification by recognized private certification organizations is a condition of licensure. Certification organizations exist to establish standards of knowledge and skill for a profession, and to assure the public that certified individuals have

demonstrated that they are qualified to practice their professions competently and safely. If, due to variations in licensing laws, alternative pathways to licensure allow unqualified or unfit individuals to practice, the public's trust in certified professionals and their regulated professions will be irreparably damaged, especially for occupations in which the public conflates certification status with licensure.

Even PCC members that issue certifications to individuals in fields that do not require licensure have an interest in this issue. Certification organizations – and professional societies that represent individuals who hold certification credentials – rely on the role of licensing agencies to protect the public. By their nature, they are also interested in upholding professional standards for knowledge, skills, conduct, and qualifications. If licensure laws create loopholes that weaken how state licensing agencies enforce such standards, this is a matter of great concern to the certification community.

Thank you for your attention to these issues and consideration of the PCC's views. Please feel free to contact us using our contact information below if you would like to discuss this further.

Sincerely,

Craig Saperstein
